SUMMARY

CS senior (Dec 2026) with 18 months of front-line help desk experience at a CUNY campus and three years running the technical side of a small game studio. Documents fixes, triages fast, and is comfortable across Windows, macOS, and Linux, with Python and Bash for automation.

SKILLS

Support: Ticket triage and documentation, hardware/software troubleshooting, account and password issues, printers, Wi-Fi/network, end-user guidance

Systems: Windows 10/11, macOS, Linux; Git/GitHub administration; build and release pipelines

Scripting & Dev: Python, Bash, C#, SQL, TypeScript/Next.js; REST APIs; PostgreSQL

EXPERIENCE

Help Desk Assistant | CUNY College of Staten Island, Staten Island, NY

Jul 2022 – Dec 2023

- Provided Tier 1 support in person, by phone, and through the campus ticketing system for students, faculty, and staff across Windows and macOS.
- Diagnosed and resolved hardware, software, printer, Wi-Fi/network, and account/password issues; escalated with clear, reproducible notes.
- Triage and prioritized incoming tickets and kept the internal knowledge base current.

Founder & Lead Developer | Siphon Games, Brooklyn, NY (remote team)

Apr 2023 – Present

- Run the technical operations of a small distributed studio: source control (Git/GitHub), access management, build and release pipeline, documentation, and onboarding for artists and contractors.
- Day-to-day technical support for non-technical teammates (tooling setup, environment issues, asset pipeline problems), with reusable how-to docs for recurring issues.
- Shipped Banana Clicker on Steam (1,000+ sales) and handled all player-facing technical support and bug triage after launch; 10+ patches.

PROJECTS

Borough Prep — Tutor Payroll — Next.js 16, TypeScript, Prisma, PostgreSQL, Auth.js, Stripe Connect [live](#) · [code](#)

- Marketing site + full-stack bookkeeping app for Borough Prep, an independent tutoring studio; replaced their shared spreadsheet and is in production with real tutors and a manager role.
- Role-based auth with invite links, an append-only ledger (rates snapshotted per class so history never rewrites), one-click Stripe Connect payouts, and a live-chat queue with staff presence heartbeat plus a rate-limited AI assistant.

Vision Bots — game agents from screen capture — Python, YOLOv8, OpenCV, Gymnasium, Stable-Baselines3 [write-up](#)

- Fine-tuned two YOLOv8 detectors on 340 hand-labelled frames (AP@0.5 0.94 on the player class); built a landmark-graph navigator with belief state and recovery behaviours, and a PPO agent driving a second game through a Gymnasium env at 15 Hz. No game API: Win32 capture in, synthetic input out.

EDUCATION

B.S. Computer Science | CUNY College of Staten Island

Expected Dec 2026

Coursework: Data Structures & Algorithms, Object-Oriented Programming, Operating Systems, Database Systems, High-Performance Computing, Calculus I–III, Linear Algebra
